

Other key things you should know about the **energy5** device

- *energy5* is a unique, patented device, without equal in the world.
- It is crafted in Taiwan using military grade technology to generate five completely natural energies.
- Resting any body part on the device when it's switched on, will ensure these energies are ingested safely.
- It is impossible to overdose or use the device too much, there are people who use it for many hours daily.
- Many people find that using *energy5* for 30 to 60 minutes daily is just right for them.
- There is a cumulative effect of the *energy5* five natural energies that improves the body's immunity.
- *energy5* is in daily use in Asia, by an estimated two million people. The device has been sold for more than a decade.
- *energy5* is a proven way to charge your cell membranes, triggering self-healing and recovery mechanisms.
- *energy5* uses acupuncture techniques to emit all five energies, improving circulation and Qi life-force energy (pronounced Chi).
- What the device does very well, is to help the human body use natural energies to **get well** and **stay well**.
- Users of *energy5* find chronic pain levels are reduced or eliminated within a few weeks of continuous use.
- *energy5* is a chemical-free way to relaxation and stress reduction, with associated sleep improvements.
- People with a primary condition (example type two diabetes), often have co-morbidity (multiple conditions). *energy5* will, through better oxygenation and circulation, help the body address each simultaneously.
- *energy5* users have reported nerve and tissue regeneration from sustained use over months.
- Every *energy5* user reports an improvement in their energy levels and skin tone.
- *energy5* helps build stronger bones, especially in older people.
- Regular use of the device has been shown to reduce blood sugar levels and blood pressure naturally.
- New users may find there is a detoxification period of up to 14 days, where conditions worsen slightly.
- *energy5* is **NOT** designed to substitute for medical care, especially not for life-threatening illnesses.
- *energy5* must **NEVER** be used by people with electronic implants such as pacemakers.
